

Feature: Place Order Payment Scenarios

Scenario: Place order when balance is enough

Given I am a logged-in user with a sufficient balance of \$100
And my shopping cart total is \$80
When I proceed to checkout
And I select "Pay from balance" as the payment method
And I confirm the order
Then the order should be placed successfully
And my balance should be deducted by \$80
And I should see an order confirmation message

Scenario: Place order when balance is finished (insufficient balance)

Given I am a logged-in user with a balance of \$50
And my shopping cart total is \$80
When I proceed to checkout
And I select "Pay from balance" as the payment method
And I confirm the order
Then the order should not be placed
And I should see an error message "Insufficient balance"
And I should be prompted to add funds or select another payment method

Scenario: Place order with partial payment from balance and remaining payment by card

Given I am a logged-in user with a balance of \$50
And my shopping cart total is \$80
When I proceed to checkout
And I select "Partial payment" using balance and card
And I confirm the order
Then \$50 should be deducted from my balance
And \$30 should be charged to my card
And the order should be placed successfully
And I should see an order confirmation message
